PROFESSIONAL SUMMARY

Web Developer with 16 years of experience building and managing WordPress websites, from fully custom-coded themes to modern page-builder platforms (Divi, Elementor, Genesis Framework). Skilled across multiple CMS platforms including Duda, Wix, and GoDaddy. Combines strong web design capability in Photoshop and Figma with hands-on SEO and performance optimization expertise, workflow automation using Zapier, and AI-assisted website development using Claude Pro and ChatGPT Plus.

CORE SKILLS

CMS & Development: WordPress (custom themes & page builders), Divi, Elementor, Genesis Framework, Duda, Wix, GoDaddy

Web Design: Adobe Photoshop, Figma — responsive, visually engaging UI/UX layouts

SEO & Performance: Google PageSpeed Insights, Google Analytics, Google Search Console, Google Tag Manager, Screaming Frog

Automation & Workflow: Zapier (app integrations & task automation)

AI-Assisted Development: Claude Pro and ChatGPT Plus for coding assistance, troubleshooting, debugging, and improving website development workflows

Hosting & Deployment: Web hosting setup, domain registration, DNS management, nameserver configuration, SSL installation, cPanel, WordPress installation, and website migration

PROFESSIONAL EXPERIENCE

Sr. WordPress Developer | Surefire Local Jan 2013 – Present

• Performed in-depth SEO audits on client WordPress websites, identifying technical, on-page, and performance issues, then implemented fixes to improve search visibility.
• Diagnosed and resolved complex WordPress issues, including plugin conflicts, theme-level bugs, performance bottlenecks, and custom functionality breakdowns.
• Built and customized WordPress themes and page builder layouts to meet client branding and functionality requirements.
• Partnered with the marketing team to align technical SEO improvements with broader campaign and content strategies.

Jr. WordPress Developer | Endlessrise Inc Jun 2012 – Jan 2013

• Developed and maintained WordPress websites, handling both front-end design and back-end configuration.
• Provided direct customer support, communicating with clients to troubleshoot issues, gather requirements, and explain solutions in clear, non-technical terms.
• Designed responsive web layouts and page elements to match client branding and usability needs.
• Assisted with site updates, content changes, and minor custom development requests.

Junior Web Developer | Mobimonster Canada Jun 2010 – May 2012

• Built and maintained WordPress websites for clients, gaining foundational experience in theme customization and site structure.
• Assisted in web design tasks, creating layout mockups and styling elements for client sites.
• Supported senior developers with coding, testing, and troubleshooting across multiple concurrent projects.
• Learned and applied WordPress development fundamentals, building the base for long-term specialization in the field.

SELECTED WEBSITES / PROJECTS

CHED MIMAROPA — mimaropa.ched.gov.ph

• Designed and developed the CHED website using WordPress, focusing on a modern, professional, and user-friendly digital platform. Worked on website structure, page layouts, content presentation, responsive design, and WordPress functionality for desktop, tablet, and mobile devices.
• Implemented on-page SEO strategies, including optimizing page titles, meta descriptions, headings, URLs, image alt text, internal linking, and content structure.
• Provided WordPress development, maintenance, troubleshooting, and ongoing improvements.

SELECTED WEBSITES / PROJECTS (CONTINUED)

Japan Pinnacle Meat Inc. — japanpinnaclemeat.com

• Designed and developed the Japan Pinnacle Meat, Inc. website using WordPress, creating a modern, premium, and visually appealing digital presence for a Japanese Wagyu and premium meat business. Developed the website structure, page layouts, navigation, product presentation, imagery, and responsive design for desktop, tablet, and mobile devices.
• Developed the website with WooCommerce readiness in mind, creating a flexible product structure to support future online ordering and eCommerce functionality. Organized product pages to accommodate product information, images, categories, and other details required for an online shopping experience.

Virtual IT — govirtual-it.com

• Designed and developed a responsive business website for Virtual IT, a managed IT services provider, using WordPress and Elementor.
• Built and styled website pages and layouts to present the company’s managed IT services, Microsoft 365 solutions, and industry-specific IT services in a clear, user-friendly format.
• Structured service and industry pages for audiences including accounting, architecture, construction, law, healthcare, manufacturing, and nonprofit organizations.
• Focused on consistent branding, responsive presentation, clear service navigation, and an accessible experience across desktop, tablet, and mobile devices.
